## SKILLS

I have all round **JavaScript** skills, mostly worked as a front-end developer. Have been writing reusable **React** components and crafting user interfaces by composing them. Got experience working with **Node** and **Express**. I am also a keen student of functional languages, so have been playing with **Standard ML**, **ReasonML**, **ELM** and **Racket**. Above all, I can quickly learn anything as per needs of the project i am working on.

## EXPERIENCE

### Arbisoft, Lahore - *Software Engineer*

FEB 2019 - Present

- Working on some plugins and themes for a [NodeBB](#) community.

### Wavetec, Lahore - *Frontend Engineer*

MAY 2018 - JAN 2019

- Wavetec specialized in the [queue management system](#). I worked on user-facing parts of a simulator which allowed our clients to simulate queues and counters in a bank branch to assess if a particular strategy would work for them or not. It was a single page app written in React.
- Maintained a legacy project written in Angular, also rewrote it using React.

### Qubit, Lahore - *Associate Product Engineer*

NOV 2017 - APR 2018

- Worked on a web portal which allowed our team to preview [recommendations](#) generated for a particular set of parameters. It was written in React.
- Worked on the user-facing parts of a project which we called Social Ads. It allowed our clients to show personalized ads on Facebook and their site based on the data collected by Qubit. I Used Preact for this project.

### Qubit, Lahore - *Intern Developer*

---

FEB 2017 - OCT 2017

- Worked on a web app which allowed our customers to import their offline data and join it with the data which was generated from their websites and mobile apps. It was also a single page app written in React and state management was handled by Redux.
- Integrated Google Analytics API with [Qubit Experiences](#), which allowed our customers to share some of the metrics on our platform with Google to be shown in Google Analytics dashboard.

## Courses

**Programming Languages (Part A)** - *University of Washington* - [link](#)

**Programming Languages (Part B)** - *University of Washington* - [link](#)

## Side Projects

### Conduit: Medium.com Clone

It is the clone of Medium.com (Frontend only), aimed to make an entry to the collection of projects listed on [realworld.io](#). You can view the source code [here](#).
